Chief, Records Management Division

MAR 4 1955

Assistant to the Executive/SI

Request for Partition in Records Center

1. As a result of recent conversations with representatives of DD/P, the Office of Scientific Intelligence requests that a section of the Records Center be partitioned off for storage of OSI documents. OSI files contain a considerable amount of material involving DD/P, and DD/P has advised that this material be stored in an area to which only OSI personnel will have access.

2. Over the next five years, OSI expects to accumulate approximately 400 legal-size safe drawers of material for storage in the Center. This figure includes the material now in the Center, documents now in OSI that are already marked for retirement, and an estimate of accumulation from 1953 through 1957.
